Keywords -- Pedagogy

 Realistic Math Education - students see the connection between what they do in the classroom and the real world

- Interactive Lecture Demonstrations students can actively participate and engage during a large lecture
- Memorable Examples that Challenge Intuition students remember these examples because they go against their original intuition

Reinforcement Learning

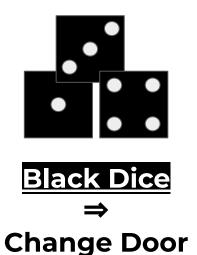

Action #1: You must pick a door.

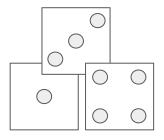

Reinforcement Learning

Action #2: You must pick if you want to change your door.

White Dice ⇒

Keep Door

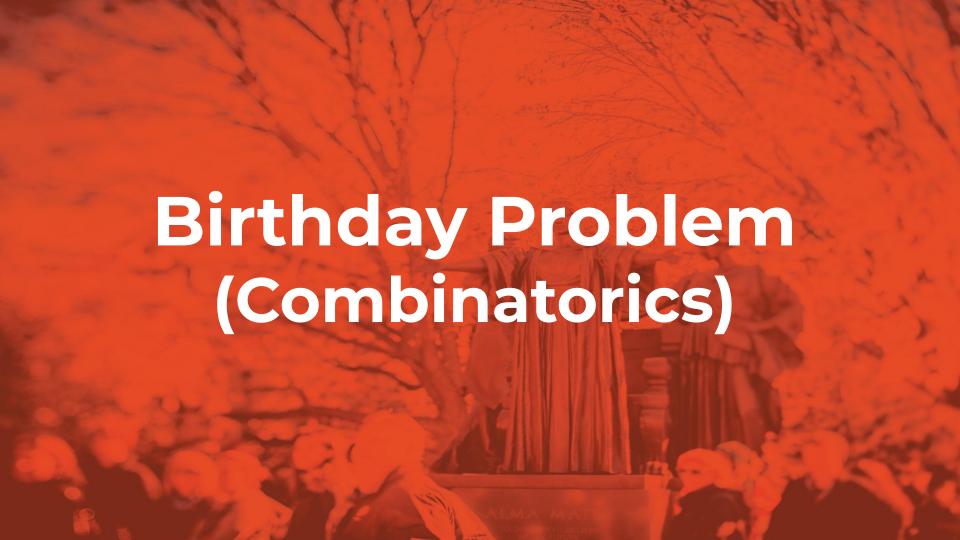

Reinforcement Learning

- When we win: (positive reward)
 - Add two dice of the winning choice!

- When we lose: (negative reward)
 - Remove the losing dice that was chosen.
